

Pathway from Bachelor of Science in Maternal Child Health: Human Lactation

Why?

- Graduate credits at the Undergraduate cost!
- Save time in degree completion!
- Get a step ahead towards a master's degree!

Students from the Bachelor of Science in Maternal Child Health: Human Lactation major can bridge into the Master of Arts in Health and Wellness Program and take up to 12 credits from their Bachelors program towards completion of a Masters degree.

MHCL to MA-HWEL Courses

Final Undergraduate Term:

MAP 508 *Elements of Scholarship*

MAP 509 *Research Methods*

My master's degree has meant a heightened level of professionalism with approaching providers unfamiliar to my field. Further, it has helped not only clients, but my own family gain a full understanding of what I do, not to mention a personal "next level" feeling of knowledge. I also believe my degree has opened doors for me that would not have existed otherwise, as it was also an exercise in assimilating research and becoming a better writer!
