**Chapter 1: 2015 – 2016 Institutional Enrollments & Student Demographics**

Unduplicated head count enrollments shown are “official” enrollments as reported to the U.S. Department of Education & NCES (IPEDS). These are headcounts, taken as a “snapshot” from the previous academic year enrollment (July 1 – June 30) in October of the preceding year. Enrollment data shown in this report include degree-seeking, registered active students, students registered for certificate programs, and students not seeking a degree or certificate.

**NOTE:** Race/ethnicity categories used in this section are those established by the U.S. Department of Education. The first question is whether the respondent is Hispanic/Latino. The second question is whether the respondent is from one or more races from the following list: American Indian or Alaska Native, Asian, Black or African American, Native Hawaiian or Other Pacific Islander, White). For further details on the guidance for collecting data, please see the full Federal Register notice. **For reporting aggregate data to the Department, the guidance identifies nine categories that will be used for IPEDS.**<sup>1</sup> The current and new race/ethnicity categories for reporting data to IPEDS are outlined below:

The U.S. Department of Education requires reporting of first-time, full-time, degree-seeking undergraduates who enter in fall term each year. Because UI&U’s undergraduate programs are primarily for degree completers (i.e., individuals who had previously attended other colleges), and because so many undergraduate students (first time and transfer) enroll part time, the number of first-time, full-time freshmen is quite small, typically representing 5 percent or less of all undergraduate students enrolling for the first time each fall.
