# SYSTEMS THINKING

## WHAT IS SYSTEMS THINKING?

Systems thinking looks at the connected wholes, rather than separate parts. By doing this, you can expose and fix the root cause, rather than treat the symptoms.

**Intro to systems thinking** is designed to help you move away from traditional methods of problem-solving and embrace a more holistic approach to analysis. This workshop will help you learn to craft holistic and sustainable solutions. Applicable to a wide range of topics and challenges, you can apply systems thinking to both your and personal and professional life.

## WORKSHOP LEARNING OBJECTIVES

- Learn how recognize a problem's variables, interdependencies, and system components.
- Understand how a system's structure determines its behavior.
- Draw simple causal loop diagrams.
- Apply brainstorming techniques to categorize variables, identify similarities and dependencies, and design and test potential courses of action.

### MEET THE INSTRUCTOR

**Dr. Jose Lugo Santiago**

DSL, ASQ CMQ-OE, PMP, CLSSMBB

Dr. Lugo Santiago is an accomplished senior executive leader, U.S. Air Force Veteran, published author, entrepreneur futurist, and keynote speaker, with more than 20 years of experience managing and transforming organizations.

For more information or questions about the workshop, please contact [dr.lugo@leadershipandforesight.org](mailto:dr.lugo@leadershipandforesight.org)
